Work Experience

CODELEAP

Senior Frontend Developer

Dec 2023 - Present

Architected and delivered high-impact features for enterprise client projects, focusing on modernization and scalability.

- Led phased migration of large-scale AngularJS 1.x and ASP.NET Core application to modern React stack (TypeScript, Jotai, TanStack Table), while ensuring continuous functionality and feature delivery.
- Developed mobile-first dashboard for Home Management Automation platform using Next.js 14 RSC, integrating ApexCharts for data visualization and multiple APIs (Enode, Awatter) with Supabase backend.
- Engineered recruitment platform features using Vue 3, TypeScript, and Pinia state management, improving user experience and application performance.
- Led Agile development practices including sprint planning, daily stand-ups, backlog grooming, and retrospectives, while utilizing Jira for project tracking and team collaboration.

Air360

Senior Frontend Developer

Oct 2023 - Nov 2024

Led development of core analytics features for Air360's internal product platform.

- Developed and optimized website analytics features for Air360 platform using Vue 3, Nuxt Bridge, and Pinia, integrated with CubeJS for data analytics and ASP.NET Core backend services.
- Architected and implemented Chrome extension dashboard utilizing Vue 3 and Vite, enhancing user monitoring and analytics capabilities.
- Established end-to-end testing framework using WebdriverIO, improving application reliability and automated test coverage across features.
- Attended weekly online meetings to confirm objectives and daily meetings for planning (SCRUM model)

Archway Factory

Developer

April 2016 - Oct 2022

Led design and implementation of awareness applications for consulting initiatives.

- Designed and implemented StaffServices web application using Vue/Nuxt for frontend architecture, SpringBoot for RESTful APIs, and Azure Cloud services for deployment and hosting.
- Developed prototype, PoC, and MVP single-page applications utilizing Vue2 and Nuxt2 for frontend, integrated with SpringBoot and ASP.NET Core REST APIs, and Azure Functions for serverless architecture.
- Implemented secure authentication and authorization using OAuth2.0 workflow for third-party integrations including Zoho CRM and Azure AD, while developing reusable Vue components.
- Architected and deployed JAMStack-based websites using modern static site generators (VuePress, VitePress, Nuxt, Jekyll) with deployments on Netlify and Vercel platforms.
- Established CI/CD pipelines using GitLab, GitHub Actions, and Azure DevOps; configured Kubernetes deployments with Docker, Helm, and Ingress for microservices architecture on Azure/GCP Cloud.
- Implemented comprehensive testing strategy using JUnit and Cypress for unit, integration, and end-to-end testing, ensuring application reliability and quality.
- Actively participated in Agile/Scrum ceremonies, collaborating with cross-functional teams to prioritize features, manage sprints, and deliver projects using Jira/Confluence for efficient project management.

Skills

- **Programming Languages:** JavaScript, TypeScript, C#, Java, GraphQL, HTML/CSS, SQL.
- **Databases:**Redis, PostgreSQL.
- **Frameworks/Libraries:** React.js, Next.js, Vue, Nuxt, .Net Core, SpringBoot.
- **Tools:** Docker, Kubernetes, GitOps, CI/CD.
- **Platforms:**GitHub, Azure, Amazon Web Services, Google Cloud Platform.
- **Leadership:** FrontEnd lead, attend meetings with customers.
- **Languages:** English (B2), Japanese (N4) Vietnamese (Native).
- **Interests:** open-source, riding, chess, biking, traveling, hat/cartoon collections.

Education

University Of Science Ho Chi Minh, Vietnam.

2009 - 2013
